ODB 54

Optical Distribution Box IP54

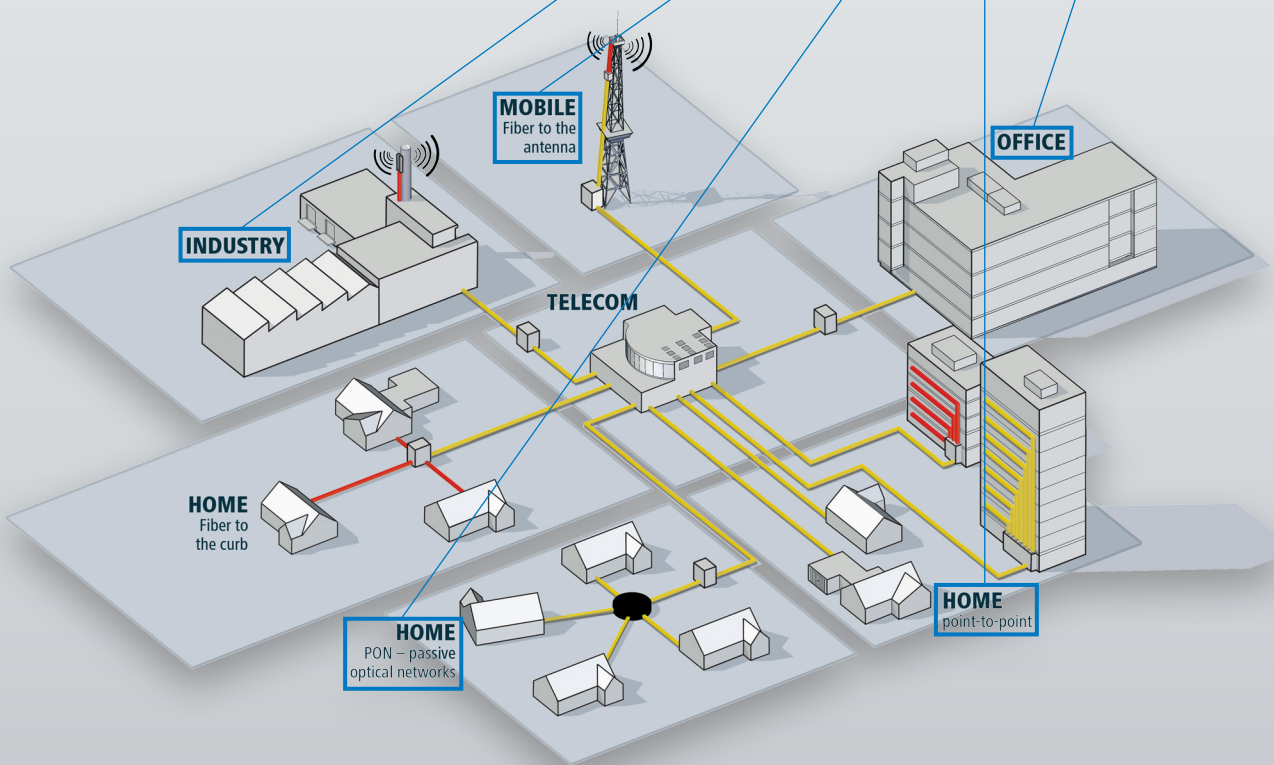

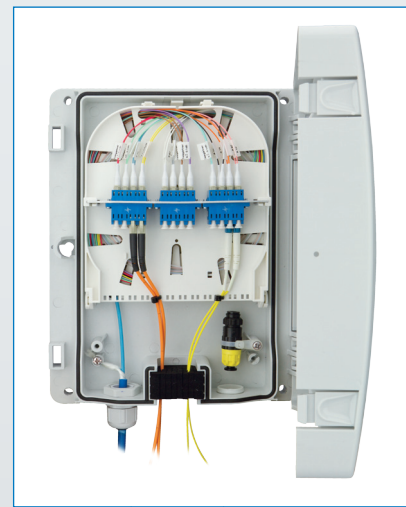

Less Fuss. More Flexibility. Universal Application.

Wherever glass fiber connections have to be installed in a harsh environment - in offices, industry or Fiber-to-the-Building/-home customer access networks - high demands are made on the value and flexibility of the distributor housing and easy access whilst installation and maintenance. The Telegärtner ODB 54 wall distributor enables you to solve various installation demands with one product. Whether it will be used as splice storage or as distributor housing, there is enough space in the

rugged plastic ODB 54 housing for accommodating up to 24 glass fiber ports. For application-specific requirements in which optical function elements such as PLC/FBT couplers or xWDM solutions also have to be installed in the glass fiber line, these can be fixed in a specially designed folding cassette. Up to 24 cables can be installed in the IP54-protected patch cable input and output quickly, easily and flexibly later without impairing the optical function of those which already exist.

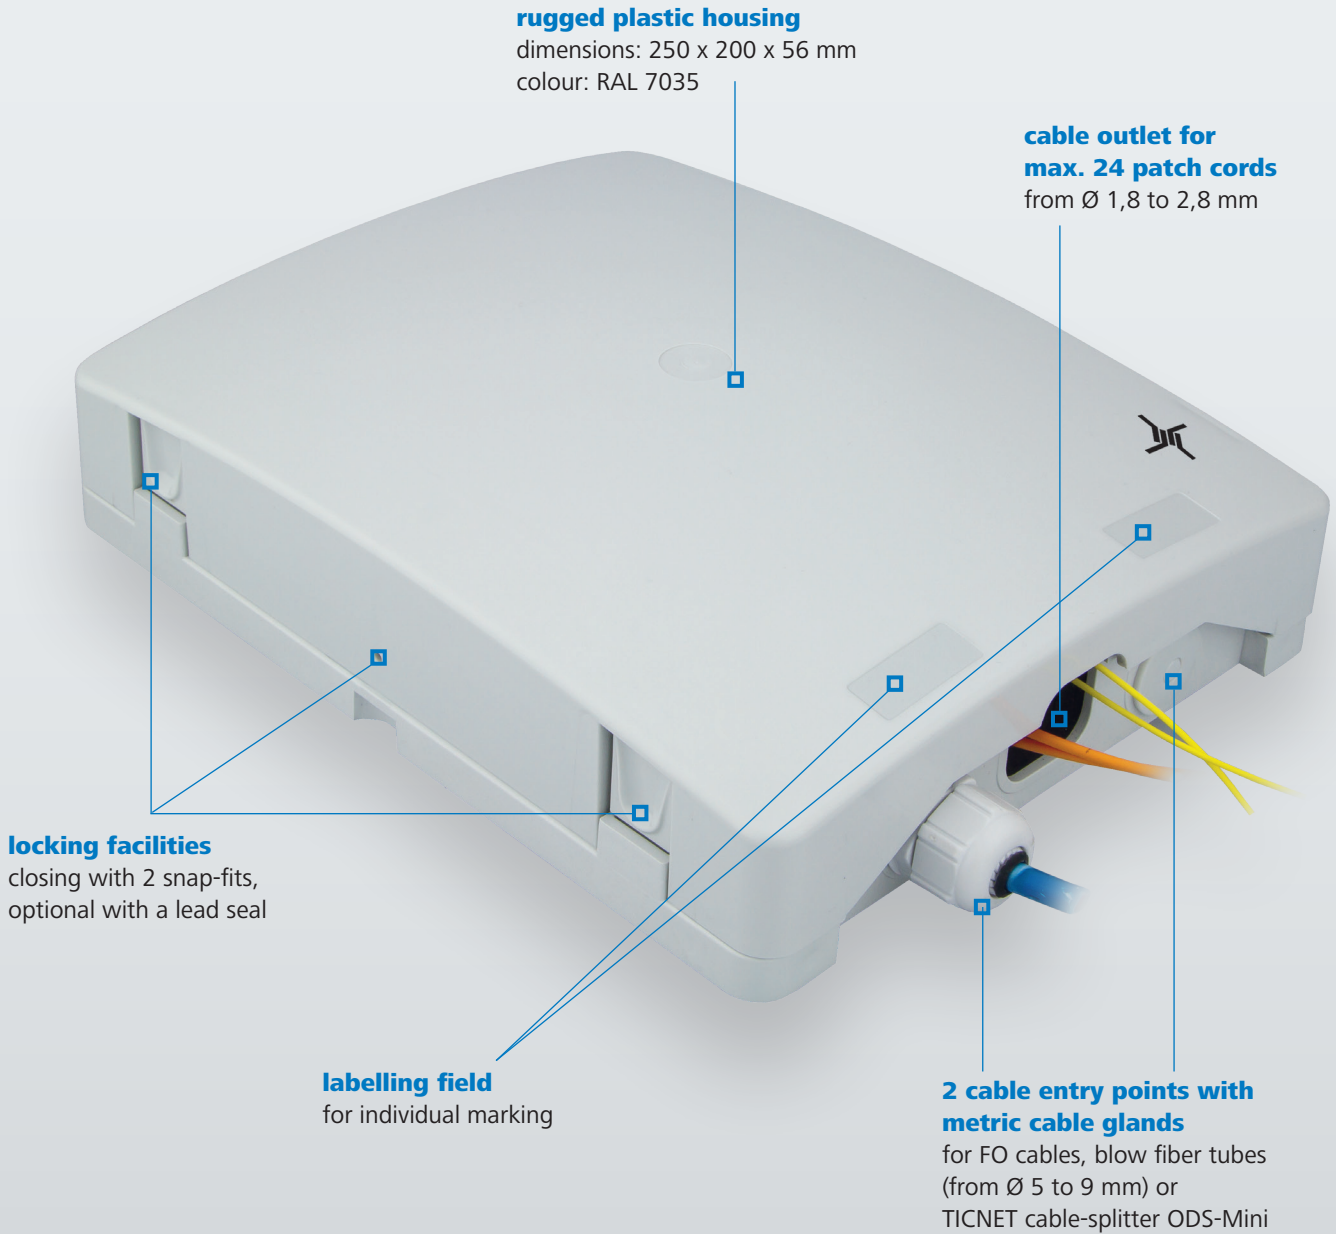

Types of Applications

In Fiber-to-the-Building/-Home Networks, the glass fibers have to be terminated and protected in the customer access area. There is also a demand for the use of different connectors and adaptors or xWDM solutions depending on the customer request. The Telegärtner ODB 54 wall distributor easily meets these requirements.

Designed to make things simpler for pre-assembled solutions: the TICNET configurator

The TICNET configurator is a convenient and quick way of ordering preassembled cabling components from the factory. Just follow six simple steps to order the product you need:

- 1 Select Type of product
- 2 Define product
- 3 Check final product
- 4 Add product to shopping basket
- 5 Enter address details
- 6 Send inquiry

Whether you need copper or optical fiber products, cables or patch panels, solutions for office buildings, data centers, industrial facilities or home networks: the TICNET configurator service is available around the clock to inquire customised products. Naturally it is also possible to save your configurations.
